Senior Information Security Engineer at DHL IT Services

👁️ All LinkedIn members

I have worked with Nazir for Imperva Incapsula Cloud WAF related cases. He has given excellent customer service.

He is technically strong. He will be an asset to any company.

to implement preventive measures.

It is without reservation that I recommend InfoSec talent. His blend of technical expertise to any team. I am confident that Kashfun will be a domain of information security.

In conclusion, Kashfun is an invaluable asset to any organization seeking a skilled, forward-thinking, and communicative information security professional. I wholeheartedly recommend him for any information security or privacy role, as his contributions can make a significant impact on safeguarding critical assets and data. It was truly an honor working alongside Kashfun, and I have every confidence in his continued success in the field of information security.

What's more?

Career Motivations

- Continuous learning
